ERD:

Task for today:

1. Create the Django Project of your group.
2. create a superuser for the django administration.
2. Create 5 apps. 1 app per student.
  - meaning each student will be assigned to a transaction(ex. a student borrows a book)
3. create the model for the app.

1. One(1) project will be submitted in your room.
2. write in your room's chat the task assignment for each member.

everyone in the group will have to implement login and registration
